November 5, 1991

TO: ALL MACHINE SHOP PERSONNEL  
FROM: CHARLES MATTHEWS   
SUBJECT: MACHINE SHIELDING

The last D.O.E. OSHA inspection sited the Technical Support Section for failure to use chip shields. Federal Law Mandates that the employer provides the proper protective equipment, and that employee's use the installed equipment.

Shields have been in place for 14 months and everyone has had ample time to become acustom to their usage.

Effective immediately All Machine Shop Personnel will have shields in place when performing chip making and other related functions. Failure to use the provided shields will result in disciplinary action, which may include termination.

Supervisors are to be vigilant and tenacious in the enforcement of this directive. Compliance with DOE Mandates can not and will not be selective.

Approved: P. Mantsch
